

Sumeet S. Chugh MD, FHRS, FAHA, FACC

Dr Sumeet S. Chugh is Director of the Heart Rhythm Center, Associate Director of the Heart Institute and holder of the Pauline and Harold Price Endowed Chair in Cardiac Electrophysiology at the Cedars-Sinai Medical Center, Los Angeles; and Professor of Medicine-in-Residence at UCLA, Los Angeles. He is a clinical cardiac electrophysiologist and investigator, and his scientific career has been dedicated to understanding sudden cardiac death: how often it occurs, the underlying causes, and the identification of novel risk factors. He founded, and continues to direct the Oregon Sudden Unexpected Death Study, ongoing since 2002. This research effort has now been expanded to the P.R.E.S.T.O. Network (PREdiction of Sudden death in mulTi-ethnic cOmmunities) based in the western United States, with a catchment population of 1.85 million. Dr Chugh is an elected member of the American Society of Clinical Investigation, and a recipient of the Howard Morgan Award for distinguished achievements in cardiovascular research and the Simon Dack Award. He has published over 150 scientific papers in the field of clinical electrophysiology, and his research program is funded by the US National Heart Lung and Blood Institute, National Institutes of Health.
